Colors will vary based on the color of the product (i.e. kraft vs. white)
For Kraft Products Only: Yellows, oranges, and pastel print colors do not print well over the color of the kraft paper and are not recommended.
CMYK: Colors may vary slightly. Colors such as bright orange, teal, and/or cool greys can vary within 10%. Total Quality Management will determine whether the difference is reasonable or if it needs adjustments.
If you are viewing this file on a computer screen please be aware the colors you are seeing may not be accurate to the final printed products. Many factors can affect the accurancy including: screen quality, calibrations, and RGB screen representation. Printing company can not verify the color accuracy if the proof is printed on an outside printer. There is no way to verify the result due to printer calibration difference.
Proof files are for content and not color accuracy.
